How can we create
more resilient
communities
of humans and
nature?

When I'm at my best, I'm resilient, smart, confident, and compassionate.

What gets me into trouble is being impatient, not listening, and overcommitting.

What I'm most afraid of is being unemployable in my field, and missing out on opportunities to make a difference.

What I'm committed to is building a just and sustainable world for all our children.
